PROFESSIONAL SUMMARY

Senior Database Support Engineer with nearly 6 years of expertise in Distributed SQL, PostgreSQL internals, and Cloud Infrastructure (AWS/Azure). **Remote-native professional** with a proven track record of scaling high-throughput databases for global enterprise clients. Adept at bridging the gap between Support and Engineering by building full-stack tools (React/Tailwind) to automate workflows. Specialist in query optimization, disaster recovery, and asynchronous cross-timezone collaboration.

WORK EXPERIENCE

Jan 2024 – Present
Bengaluru, India

Database Cloud Support Engineer
SingleStore DB (Distributed SQL)

- Spearheaded Tier-3 technical support for SingleStore's distributed architecture, troubleshooting complex sharding, replication, and partition tolerance issues for Fortune 500 clients.
- Achieved **99.9% uptime** for high-throughput workloads by performing deep-dive analysis of infrastructure bottlenecks using Linux system tools, SQL diagnostics, and Wireshark.
- Accelerated incident resolution by **15%** by collaborating closely with Engineering to isolate bugs in the storage engine and query optimizer.
- Authored authoritative best-practice guides for deploying distributed clusters, focusing on High Availability (HA) and Disaster Recovery (DR).
- Built internal automation scripts to streamline log analysis, reducing case triage time.

Jul 2022 – Jan 2024
Bengaluru, India

Cloud Support Associate (PostgreSQL)
Amazon Web Services (AWS)

- Served as Subject Matter Expert (SME) for Amazon RDS and Aurora PostgreSQL, diagnosing critical performance issues involving Autovacuum tuning, WAL usage, and lock contention.
- Guided **50+ enterprise customers** through major version upgrades and zero-downtime migrations (DMS) with precision planning.
- Reduced issue resolution time by **20%** by proactively identifying and escalating complex bugs to the RDS service team.
- Maintained a **4.8/5 CSAT rating** by translating complex database concepts into clear, actionable advice for both technical and non-technical stakeholders.

Apr 2020 – Jul 2022
Mysore, India

Senior System Associate
Infosys

- Administered Linux/Windows systems for 100+ users, automating patch management and configuration using PowerShell and Bash.
- Maintained **99% system uptime** through proactive monitoring and independent resolution of network performance incidents.

TECHNICAL PROJECTS

Jan 2026 **Andaman Planner Pro (AI Travel App)** *(React, Tailwind CSS, Supabase)*

- Developing a full-stack AI-powered travel planning application for the Andaman Islands.
- Integrated AI algorithms to generate personalized itineraries based on user preferences and budget.
- Built a responsive, modern frontend using React and Tailwind CSS for a seamless user experience.

Jan 2026 **Developer Portfolio** *(React, Tailwind CSS)*

- Designed and deployed a high-performance personal portfolio site to showcase technical case studies and engineering blogs.

TECHNICAL SKILLS

AWS (RDS, EC2) **Azure** **Linux** **Docker** **PostgreSQL** **MySQL** **SingleStore** **DynamoDB** **Redis** **React.js** **Tailwind CSS** **Supabase** **Python** **Bash** **Wireshark** **Datadog** **Git**

EDUCATION

2020 **Bachelor of Computer Applications (BCA)**
Jain (Deemed-to-be University) – Cloud Technology and Info Security

Grade: 7.4/10

CERTIFICATIONS & INFO

- **Certifications:** AWS Certified Solutions Architect – Associate (2025) | Microsoft Certified: Azure Fundamentals (AZ-900) | Web Application Penetration Testing | Cyber Security For Business
- **Availability:** Open to early morning IST hours (US overlap) and weekend coverage.
- **Remote Work:** Fully equipped for asynchronous remote work; experienced in self-managing priorities.
